

CHALLENGE:

Saltire Software will provide sponsorship of 75 Euros to help cover the cost of attendance at the First Central- and Eastern European Conference on Computer Algebra- and Dynamic Geometry Systems in Mathematics Education.

Sponsorship will be given to the 2 applicants who provide the best write ups of the use of Geometry Expressions either in combination with a Computer Algebra System or on its own. Write ups should be in a form useable in a classroom setting.

Particular weight will be given to the use of the symbolics and the constraint based approach which are the defining characteristics of Geometry Expressions.

In addition to sponsorship, we will give a free copy of Geometry Expressions to any contributors whose material we post on our website.

The trial version of Geometry Expressions can be used for the purposes of this challenge, and can be downloaded from our website:

www.geometryexpressions.com

Please send applications to:

Dr. Philip Todd, VP R&D, Saltire Software,
